

## Open Access at Bennington College

### Faculty Resolution

---

The Faculty of Bennington College is resolved to share our scholarship widely by having our work available in the College's institutional repository. By providing open access to our research and data we encourage the broadest use of our scholarship to support the research and education of all, regardless of means or affiliation.

This commitment to sharing our work with the public and academic community includes electronic versions of articles and data sets that faculty has submitted to the Bennington College Digital Repository. The library will help obtain open access copyrights from publishers, and will assist the faculty in the wide distribution of their scholarship.

October 2016
